The attention of Members is drawn to Rule XV. in the Price List, in which it is clearly stated that all orders must be prepaid. ## ALLSOPP'S AND BASS'S ALE CASKS.

## EXPORT LIST.

It frequently occurs that goods not mentioned in the Export List are ordered, which are quite unsuitable for shipment abroad. Members are, therefore, informed that such goods are only shipped at their entire risk, and no after claim whatever will be entertained for supposed inferiority or deterioration.

## THE MERCHANDISE MARKS ACT, 1887.

By this Act, which only received the Royal Assent on the 23rd August, 1887, penalties are imposed upon all persons who apply "any false trade description," to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by, or on behalf of the seller and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

Members ordering any Articles from the Lists last published are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

By Order,

C. RICHARDS,

Secretary.

## PROVISIONS.

Enclosures from other Departments ought not to be included with Provisions, as the latter may, in consequence, possibly be delayed and spoiled.

Bacon—Wiltshire and Waterford—supplied by the Society, consists of two descriptions, viz., sizeable and medium meat; the sizeable Bacon is the smaller and leaner meat, the medium is the fatter and heavier. The medium is always sold at a cheaper price than the sizeable, and in ordering it should be stated whether sizeable or medium is required.

The Bacon supplied by the Society is cured mild to suit the tastes of Members, and it is strongly advised, especially in the summer months, that orders for not more than a fortnight's consumption should be given. When a whole side is taken, the fore end should be used first.

All Provisions not meeting with approval should be returned within a week

Members giving orders for Eggs, Fresh Butter, Cooked Hams, and such perishable articles to be sent, will please note that it is entirely at their own risk

## THE RANELAGH NEW PATENT MOUNT.

A new invention, intended to simplify the connecting and disconnecting of mouthpiece from bowl.

Method of working.—Insert the pin on the mouthpiece in the slot cut for its reception on the stem, give a slight turn, and the stem and mouthpiece will be securely joined. The advantages claimed over the old style of screw are the extreme ease and rapidity with which the manipulation can be effected. It cannot be overscrewed, thus preventing the possibility of the bowl becoming loose or out of angle. In consequence of the increasing demand for a pipe in case, compact and portable for the pocket, it is to this form of pipe that the new mount is specially adapted.

## ADDITIONS.

## WEBLEY'S GOVERNMENT REVOLVER (MODEL, 1886).

The principal features of this Revolver are—

- (a) The strong and absolutely safe breech fastening.
- (b) The improved firing mechanism.
- (c) The free revolution of the cylinder.
- (d) The prevention of the fouling of the mechanism.
- (e) The double locking of the cylinder.
- (f) The quick and accurate sighting.
- (g) Fewness of parts and general strength and simplicity.

This revolver, if not securely fastened at the breech, cannot be fired, because the projection on the forehead of the hammer will come in contact with the stirrup fastener, and so prevent the nose of hammer from reaching the cap. Hence blowing open, and the disabling of the revolver is rendered impossible.

Perfect freedom of the cylinder, so necessary to accurate shooting, is secured by the method of mounting the cylinder, the bearing being almost frictionless, and safeguarded by patent arrangement for preventing the ingress of fouling from the flash.

This revolver is made throughout to gauge, and is interchangeable. Special care is given to the important point of having the chamber and barrel in a true line with each other, without which accurate shooting cannot be made.

### FRETWORK APPLIANCES—continued.

#### THE IMPROVED ROGER'S FRET SAW With Blower and Drilling Attachments.

The table of iron is adjustable for inlaying. The frame of the machine is all of iron, neatly painted. The height of table above the floor is 32 inches. The belt wheel is 12 inches diameter, with a 5-inch fly-wheel. The arms give 18 inches in the clear. The clamps are hung on pivots, and will hold the finest saws. A drill and wrench are sent with the Machine, and an effective blower is also attached. Weight, complete, 25 lb.

No. 1, 15/0.

No. 2, with nickel-plated table and emery wheel, 18/0.

#### THE "IMPROVED LESTER."

It consists of scroll saw, with circular saw and lathe attachments, and possessing the advantage of a much more expensive machine.

The design is graceful and compact, at the same time calculated for strength, durability, and accuracy.

It is made of iron, and all the working parts of steel, except the pitman and arms, which are ash.

The driving wheel is 15 inch diameter, and weighs 13 lb., which great weight gives strength, steadiness, and firmness to the stroke of the saw, and increases its capacity for sawing thick wood.

The scroll saw attachment is provided with a nickel-plated tilting table for inlaid work.

The arms swing 18 inches in the clear, and have a dust blower which works automatically.

This machine possesses one of the greatest improvements which has been applied to fret machines for many years, viz., a clamp and strainer combined, which, by simply moving a lever at the front end of the upper arm, clamps and strains the saw blade instantly. It also has a roller inserted in the table back of the saw, which makes it run perfectly true.

The circular saw attachment consists of a saw 3 inches diameter, and an iron table 3 inches by 4½ inches. This saw will cut up to ½ inch stuff.

It is also furnished with a solid emery wheel, and drilling attachment, accompanied by six best steel drills, assorted sizes.

THE "EUPHORON." A New Luggage Carrier.

LOADED.

CLOSED FOR PUTTING AWAY.

The "Euphoron" has been designed to meet successfully the great difficulties and annoyance generally experienced in transferring heavy articles of luggage, such as packed boxes, trunks, portmanteaux, &c., from lower to higher floors, and vice versa; and with a view to rendering unnecessary the objectionable practice of dragging the article being removed along passages and down staircases, which frequently has to be resorted to in cases where the "Euphoron" is not in use.

As everyone is aware, the old method of conveyance is often attended with injury to the persons engaged in lifting heavy articles, and damage is not unfrequently done to stair carpets, bannisters, and furniture, through the awkwardness of handling heavy and bulky boxes, &c.

The present charge for renewal is 2/6.

### ORDERS BY POST.

The attention of Members is specially drawn to Rule 26  
as to using a separate order form for each department. The  
non-observance of this rule leads to delay in the execution of  
orders.

### HAVANAH CIGARS.

Owing to its large reserve of the 1885 Crop, the Society is  
free from the necessity of listing any of the unsatisfactory  
1886's for the present. The latter can, of course, always be  
obtained to order; but should certain sizes of 1885's run  
out, Members are recommended to apply for the nearest to  
them in size and price, as in most brands many sizes are  
very similar.

### STOCKTAKING.

The Stores will be closed on Tuesday and  
Wednesday, the 1st and 2nd February, for  
Stocktaking.

### H.R.H. THE DUKE OF CAMBRIDGE.

The Autograph Proofs of the Engraving of H.R.H. the  
Duke of Cambridge, having been signed by H.R.H., are now  
ready for delivery. As, however, the number of the prints  
in this state is limited to 100, and a large proportion of this  
number have already been subscribed for, Members desirous  
of obtaining a copy are requested to forward their applica-  
tions for same to the Secretary as early as possible.

The Artist Proofs will be ready for delivery very shortly,  
after which the Prints will be issued; and as the former are  
limited in number, and a large sale is expected for the latter,  
Members who wish to secure a copy of either are advised to  
make their applications at once. Prices as follows:—

### SPECIAL NOTICE.

#### DEFICIENCIES IN REMITTANCES.

The attention of Members is drawn to Rule XV. in the  
Price List, in which it is clearly stated that all orders must  
be prepaid. Non-observance of this Rule may lead to delay  
in the execution of the orders concerned. As there are  
occasionally alterations in prices, it is advisable when  
remitting to allow a few shillings beyond the amount of the  
order. A credit note will be returned for any surplus.

(White China, decorated with natural coloured cactus flowers, cupids, and gold).

This latter is much used for table decoration. It is made in Comptiers of various heights and shapes and fancy designs, suitable for centres, side pieces, and corners of dining table; also menus, specimens, &c., and other pieces suitable for decorating a table *en suite*.

**WATCHES.**

Owing to the demand for Keyless Watches, the Society has reduced several of its Gold Key-winding Watches 10 per cent.

**ALLSOPP'S AND BASS'S ALE CASKS.**

Members having the above Ales sent into the country will much oblige, when returning the Empty Casks, by detaching the lower portion of the label (which is perforated) and forwarding it by post to the Secretary, after obtaining the signature of the railway official to whom it is handed. By this means much trouble and correspondence will be avoided.

**EXPORT LIST.**

It frequently occurs that goods not mentioned in the Export List are ordered, which are quite unsuitable for shipment abroad. Members are, therefore, informed that such goods are only shipped at their entire risk, and no after claim whatever will be entertained for supposed inferiority or deterioration.

## No. 1 Department—continued.

## PROVISIONS.

Enclosures from other Departments ought not to be included with Provisions, as the latter may, in consequence, possibly be delayed and spoiled.

Bacon—Wiltshire and Waterford—supplied by the Society, consists of two descriptions, viz., sizeable and medium meat; the sizeable Bacon is the smaller and leaner meat, the medium is the fatter and heavier. The medium is always sold at a cheaper price than the sizeable, and in ordering it should be stated whether sizeable or medium is required.

The Bacon supplied by the Society is cured mild to suit the tastes of Members, and it is strongly advised, especially in the summer months, that orders for not more than a fortnight's consumption should be given. When a whole side is taken, the fore end should be used first.

All Provisions not meeting with approval should be returned within a week.

Members giving orders for Eggs, Fresh Butter, Cooked Hams, and such perishable articles to be sent, will please note that it is entirely at their own risk.

### HAVANAH CIGARS.

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

A new invention, intended to simplify the connecting and disconnecting of mouthpiece from bowl.

Method of working.—Insert the pin on the mouthpiece in the slot cut for its reception on the stem, give a slight turn, and the stem and mouthpiece will be securely joined. The advantages claimed over the old style of screw are the extreme ease and rapidity with which the manipulation can be effected. It cannot be overscrewed, thus preventing the possibility of the bowl becoming loose or out of angle. In consequence of the increasing demand for a pipe in case, compact and portable for the pocket, it is to this form of pipe that the new mount is specially adapted.

## ADDITIONS.

## WEBLEY'S GOVERNMENT REVOLVER (MODEL, 1886).

The principal features of this Revolver are—

- (a) The strong and absolutely safe breech fastening.
- (b) The improved firing mechanism.
- (c) The free revolution of the cylinder.
- (d) The prevention of the fouling of the mechanism.
- (e) The double locking of the cylinder.
- (f) The quick and accurate sighting.
- (g) Fewness of parts and general strength and simplicity.

This revolver, if not securely fastened at the breech, cannot be fired, because the projection on the forehead of the hammer will come in contact with the stirrup fastener, and so prevent the nose of hammer from reaching the cap. Hence blowing open, and the disabling of the revolver is rendered impossible.

Perfect freedom of the cylinder, so necessary to accurate shooting, is secured by the method of mounting the cylinder, the bearing being almost frictionless, and safeguarded by patent arrangement for preventing the ingress of fouling from the flash.

This revolver is made throughout to gauge, and is interchangeable. Special care is given to the important point of having the chamber and barrel in a true line with each other, without which accurate shooting cannot be made.

## FRETWORK APPLIANCES—continued.

## THE "IMPROVED LESTER."

It consists of scroll saw, with circular saw and lathe attachments, and possessing the advantage of a much more expensive machine.

The design is graceful and compact, at the same time calculated for strength, durability, and accuracy.

It is made of iron, and all the working parts of steel, except the pitman and arms, which are ash.

The driving wheel is 15 inch diameter, and weighs 13 lb., which great weight gives strength, steadiness, and firmness to the stroke of the saw, and increases its capacity for sawing thick wood.

The scroll saw attachment is provided with a nickel-plated tilting table for inlaid work.

The arms swing 18 inches in the clear, and have a dust blower which works automatically.

This machine possesses one of the greatest improvements which has been applied to fret machines for many years, viz., a clamp and strainer combined, which, by simply moving a lever at the front end of the upper arm, clamps and strains the saw blade instantly. It also has a roller inserted in the table back of the saw, which makes it run perfectly true.

The circular saw attachment consists of a saw 3 inches diameter, and an iron table 3 inches by 4½ inches. This saw will cut up to ¼ inch stuff.

It is also furnished with a solid emery wheel, and drilling attachment, accompanied by six best steel drills, assorted sizes.

## AYRES'S TURF LEVELLER.

For levelling Tennis Courts, Cricket Grounds, Lawns, &amp;c.

This machine is composed of a trough, 6 or 7 feet long, attached to a pair of wheels by two iron stays prolonged forward, so as to form a handle, as shown in the engraving.

By the use of this machine all inequalities in the turf are quickly and efficiently removed, and worm casts destroyed without "picking up" the earth of which they are composed.

THE "EUPHORON." A New Luggage Carrier.

LOADED.

CLOSED FOR PUTTING AWAY.

The "Euphoron" has been designed to meet successfully the great difficulties and annoyance generally experienced in transferring heavy articles of luggage, such as packed boxes, trunks, portmanteaux, &c., from lower to higher floors, and vice versa; and with a view to rendering unnecessary the objectionable practice of dragging the article being removed along passages and down staircases, which frequently has to be resorted to in cases where the "Euphoron" is not in use.

As everyone is aware, the old method of conveyance is often attended with injury to the persons engaged in lifting heavy articles, and damage is not unfrequently done to stair carpets, bannisters, and furniture, through the awkwardness of handling heavy and bulky boxes, &c.

#### CASH REMITTANCES FOR SMALL AMOUNTS.

Members are informed that Postage Stamps cannot in  
future be received for amounts exceeding 1/0; above that sum  
it is advised that Postal Orders be used. Care should  
however be taken that these are duly crossed with the name  
of the Society's Bankers, "London and Westminster Bank  
Limited."

#### GOODS DAMAGED IN TRANSIT.

Should it be discovered that goods have been damaged, or  
articles stolen from packages during transit, Members will  
oblige by giving information at once to the Station Master  
or local Agent from whom the goods are received. By so  
doing the settlement of claims will be much facilitated.

#### TOOLS.

As many Tools supplied by the Society are obtained from  
America, or have to be specially made, it cannot be  
guaranteed that all kinds are always in stock.

#### HALF-YEARLY PRICE LIST.

The Half-yearly Price List is now issued on the 15th  
March and 15th September. The prices in this Circular will  
be **cancelled** by those appearing in the Price List of the  
15th inst., with the exception of the reductions in Tobacco  
and Cigarettes.

The rates for conveyance of Gunpowder are as follows on all Railways:—

In Kegs or Barrels, Card Board Boxes in Cases, minimum charge (station to station up to 1 cwt.) 10/0  
In Canisters, enclosed in Case or Kegs, minimum charge (station to station up to 1 cwt.) ... 7/6  
If in Metallic Cylinders, minimum charge (station to station up to 1 cwt.) ... 3/6  
Except on the L. B. & S. C. Ry. where the minimum charge for carriage is 5/0. Cylinders must be returned to manufacturers immediately, or a charge of 60/0 will be made.  
If Powder is intended for Shipment it will not be sent out in Cylinders.

**ORDERS BY POST.**

The attention of Members is specially drawn to Rule 26 as to using a separate order form for each department. The non-observance of this rule leads to delay in the execution of orders.

**HAVANAH CIGARS.**

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order; but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

**H.R.H. THE DUKE OF CAMBRIDGE.**

The Autograph Proofs of the Engraving of H.R.H. the Duke of Cambridge, having been signed by H.R.H., are now ready for delivery. As, however, the number of the prints in this state is limited to 100, and a large proportion of this number have already been subscribed for, Members desirous of obtaining a copy are requested to forward their applications for same to the Secretary as early as possible.

The Artist Proofs will be ready for delivery very shortly, after which the Prints will be issued; and as the former are limited in number, and a large sale is expected for the latter, Members who wish to secure a copy of either are advised to make their applications at once. Prices as follows:—

Autograph Proofs (limited to 100), signed by H.R.H. The Duke of Cambridge; also by Artist and Engraver	... ..	£3 3 0
Artist Proofs (limited to 200), signed by Artist and Engraver	... ..	2 2 0
Prints on India Paper	... ..	1 1 0

**SPECIAL NOTICE****DEFICIENCIES IN REMITTANCES.**

The attention of Members is drawn to Rule XV. in the Price List, in which it is clearly stated that all orders must be prepaid. Non-observance of this Rule may lead to delay in the execution of the orders concerned. As there are occasionally alterations in prices, it is advisable when remitting to allow a few shillings beyond the amount of the order. A credit note will be returned for any surplus.

**NEW SEASON'S FRUITS (1886-7).**

The Society has received the choicest selection of this season's Muscatels, Figs, French, Carlsbad, and Elvas Plums; also Crystallized and Glacé Fruits of all descriptions, which are on show in the Fancy Fruit Department.

**EGYPTIAN CIGARETTES.**

The attention of Members is called to the Egyptian Cigarettes, quoted on page 21 in Price List, as under-mentioned:—

"Ras El Tin Palace," per 100	7/0, 10/0, 12/0
"Princess Mansour,"	7/0.
"Khedives,"	6/4.
"Beys Especial,"	5/9.

**No. 7 DEPARTMENT.**

In consequence of the rise in the price of Silver, a slight advance will be made in the present List Prices of Silver Plate.

**No. 11.- CHINA AND GLASS DEPARTMENT.****FAIRY LAMPS.**

A large selection in the Department, consisting of Lamps for Dining Tables, Conservatories, &c., &c.; also Chandeliers in various Coloured and Cut Crystal Candelabras.

Members' attention is called to the reduction in price of Table Glass.

The attention of Members is called to the new selection of Breakfast, Dinner, Dessert, Tea, and Toilet Services, now on show in the Department.

**WHITE CHINA.**

The Society has on show a choice selection of Compotiers Figures, Candelabras, &c.; and also some of the latest designs in the

**"CACTUS" CHINA**

(White China, decorated with natural coloured cactus flowers, cupids, and gold).

This latter is much used for table decoration. It is made in Compotiers of various heights and shapes and fancy designs, suitable for centres, side pieces, and corners of dining table; also menus, specimens, &c., and other pieces suitable for decorating a table *en suite*.

**WATCHES.**

Owing to the demand for Keyless Watches, the Society has reduced several of its Gold Key-winding Watches 10 per cent.

**ALLSOPP'S AND BASS'S ALE CASKS.**

Members having the above Ales sent into the country will much oblige, when returning the Empty Casks, by detaching the lower portion of the label (which is perforated) and forwarding it by post to the Secretary, after obtaining the signature of the railway official to whom it is handed. By this means much trouble and correspondence will be avoided.

**EXPORT LIST.**

It frequently occurs that goods not mentioned in the Export List are ordered, which are quite unsuitable for shipment abroad. Members are, therefore, informed that such goods are only shipped at their entire risk, and no after claim whatever will be entertained for supposed inferiority or deterioration.

**STILTON CHEESE.**

The Society has now received its choicest dairies of Stilton, suitable for immediate use. They will be found of excellent quality.

**EXTENSION OF THE SUBURBAN DELIVERY.**

Abbey Wood, Belvedere, Bexley Heath, Bexley New Town, Chadwell Heath, East Wickham, Erith, Kingsbury, Northumberland Heath, and Welling, are now included in Messrs. Carter, Paterson and Co.'s deliveries.

**GILDING.**

The Society now undertakes the Gilding of Picture Frames, Pier Glasses, Girandoles, Mirror Frames, &c., and all descriptions of Re-Gilding.

Further information may be obtained in No. 12 Department.

## PROVISIONS.

Enclosures from other Departments ought not to be included with Provisions, as the latter may, in consequence, possibly be delayed and spoiled.

Bacon—Wiltshire and Waterford—supplied by the Society, consists of two descriptions, viz., sizeable and medium meat; the sizeable Bacon is the smaller and leaner meat, the medium is the fatter and heavier. The medium is always sold at a cheaper price than the sizeable, and in ordering it should be stated whether sizeable or medium is required.

The Bacon supplied by the Society is cured mild to suit the tastes of Members, and it is strongly advised, especially in the summer months, that orders for not more than a fortnight's consumption should be given. When a whole side is taken, the fore end should be used first.

All Provisions not meeting with approval should be returned within a week.

Members giving orders for Eggs, Fresh Butter, Cooked Hams, and such perishable articles to be sent, will please note that it is entirely at their own risk.

**No. 2 Department—CIGARS AND TOBACCO.****HAVANAH CIGARS.**

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

## THE RANELAGH NEW PATENT MOUNT.

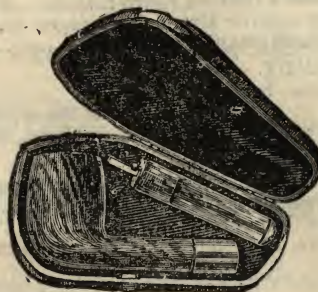

A new invention, intended to simplify the connecting and disconnecting of mouthpiece from bowl.

Method of working.—Insert the pin on the mouthpiece in the slot cut for its reception on the stem, give a slight turn, and the stem and mouthpiece will be securely joined. The advantages claimed over the old style of screw are the extreme ease and rapidity with which the manipulation can be effected. It cannot be overscrewed, thus preventing the possibility of the bowl becoming loose or out of angle. In consequence of the increasing demand for a pipe in case, compact and portable for the pocket, it is to this form of pipe that the new mount is specially adapted.

"Rama" is a sweet little love idyll, told simply and straightforwardly, with some bits of real pathos towards the end. There are several exciting scenes in the book, and the account of a village tournament of wrestling, singlestick, and other sports is given with much spirit. Altogether we may say that Colonel Barras wins much <i>abroo</i> in his <i>Khustee</i> with the difficulties of story telling, and that we shall require no <i>Rishwat</i> to read his next attempt."— <i>Vanity Fair</i> , February 5, 1887.

### WEBLEY'S GOVERNMENT REVOLVER (MODEL, 1886).

The principal features of this Revolver are—

- (a) The strong and absolutely safe breech fastening.
- (b) The improved firing mechanism.
- (c) The free revolution of the cylinder.
- (d) The prevention of the fouling of the mechanism.
- (e) The double locking of the cylinder.
- (f) The quick and accurate sighting.
- (g) Fewness of parts and general strength and simplicity.

This revolver, if not securely fastened at the breech, cannot be fired, because the projection on the forehead of the hammer will come in contact with the stirrup fastener, and so prevent the nose of hammer from reaching the cap. Hence blowing open, and the disabling of the revolver is rendered impossible.

Perfect freedom of the cylinder, so necessary to accurate shooting, is secured by the method of mounting the cylinder, the bearing being almost frictionless, and safeguarded by patent arrangement for preventing the ingress of fouling from the flash.

This revolver is made throughout to gauge, and is interchangeable. Special care is given to the important point of having the chamber and barrel in a true line with each other, without which accurate shooting cannot be made.

Price, Blued .....	£5 15 0

## THE "IMPROVED LESTER."

It consists of scroll saw, with circular saw and lathe attachments, and possessing the advantage of a much more expensive machine.

The design is graceful and compact, at the same time calculated for strength, durability, and accuracy.

It is made of iron, and all the working parts of steel, except the pitman and arms, which are ash.

The driving wheel is 15 inch diameter, and weighs 13 lb., which great weight gives strength, steadiness, and firmness to the stroke of the saw, and increases its capacity for sawing thick wood.

The scroll saw attachment is provided with a nickel-plated tilting table for inlaid work.

The arms swing 18 inches in the clear, and have a dust blower which works automatically.

This machine possesses one of the greatest improvements which has been applied to fret machines for many years, viz., a clamp and strainer combined, which, by simply moving a lever at the front end of the upper arm, clamps and strains the saw blade instantly. It also has a roller inserted in the table back of the saw, which makes it run perfectly true.

The circular saw attachment consists of a saw 3 inches diameter, and an iron table 3 inches by 4½ inches. This saw will cut up to ¾ inch stuff.

It is also furnished with a solid emery wheel, and drilling attachment, accompanied by six best steel drills, assorted sizes.

The lathe attachment is provided with iron ways and rest, steel centres, and set of fine steel turning tools. Length of bed, 15 inches; distance between centres 9 inches; swing, 3 inches; length of rest, 4 inches.

The following are supplied with each machine, viz.:—6 saw blades, wrench, screw-driver, 2 sheets designs, and a handy box for small tools.

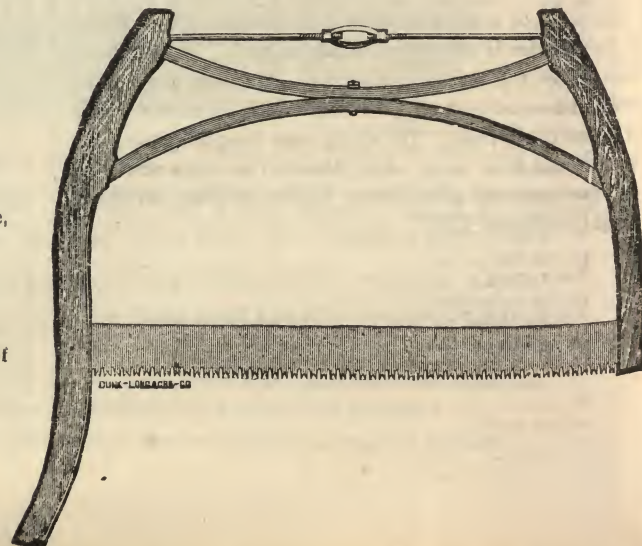

Securely packed in a strong case. Weight 50 lb. Price, 45/0.

## THE BOY'S BRACE FRAME WOOD SAW.

Small size saw in frame, with saw buck complete, 2/6.

These are really strong useful tools, and capable of doing rough work.

The table is of mahogany and is 24 inches square by  $\frac{5}{8}$  inch thick and can be raised to any height for grooving or rabbeting when required.

The fly wheel is 23 inches in diameter and weighs 58 lb.

The saw is 8 inches in diameter, and is driven by a 1 inch leather belt.

The table is fitted with a wood block for cutting mitres, which slides in a groove in the table.

A movable iron guide is also provided for ordinary work.

Price..... £5 12 6

## THE "GOODELL" LATHE AND SCROLL SAW.

Improved pattern machine, with large driving wheel which has two grooves of varying depths on its face to give a change of speed as the belt runs from it to the cone pulley on the lathe head. The higher speed is 11 to 1, the lower 7 to 1. The lathe head is provided with a 2-inch face plate, a spur centre, a screw centre for turning cups, and also a drill chuck to hold from  $\frac{1}{8}$  to  $\frac{1}{2}$  twist drills for drilling iron or wood. It has also, on the outer side of pulley, a  $4\frac{1}{2}$  by  $\frac{3}{4}$  inch solid emery wheel and a drill spindle, with set screw to hold drill points for wood drilling.

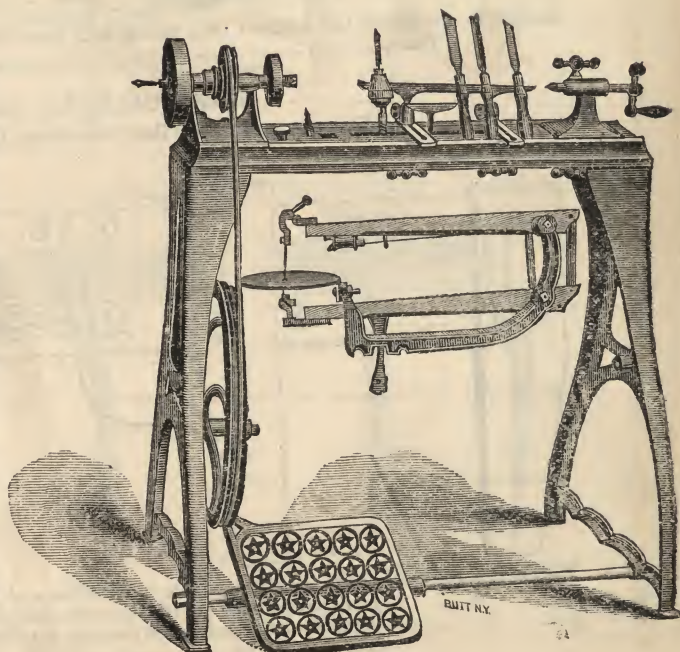

The tail stock has a screw feed centre which is secured at any point desired by a clamping arrangement like that on the modern engine lathes. It is also provided with a long and short tool rest, 5 turning tools, wrench, drill points, &c.

Swing of lathe 5 inches; length of bed 24 inches; distance between centres  $15\frac{1}{2}$  inches.

The scroll sawing attachment is secured to lathe bed by one bolt, and can be put on and off at pleasure.

This lathe is thoroughly built and highly finished; the planed and polished parts being nickel plated.

## AYRES'S TURF LEVELLER.

For levelling Tennis Courts, Cricket Grounds, Lawns, &amp;c.

This machine is composed of a trough, 6 or 7 feet long, attached to a pair of wheels by two iron stays prolonged forward, so as to form a handle, as shown in the engraving.

By the use of this machine all inequalities in the turf are quickly and efficiently removed, and worm casts destroyed without "picking up" the earth of which they are composed.

## THE "EUPHORON." A New Luggage Carrier.

LOADED.

CLOSED FOR PUTTING AWAY.

The "Euphoron" has been designed to meet successfully the great difficulties and annoyance generally experienced in transferring heavy articles of luggage, such as packed boxes, trunks, portmanteaux, &c., from lower to higher floors, and vice versa; and with a view to rendering unnecessary the objectionable practice of dragging the article being removed along passages and down staircases, which frequently has to be resorted to in cases where the "Euphoron" is not in use. As everyone is aware, the old method of conveyance is often attended with injury to the persons engaged in lifting heavy articles, and damage is not unfrequently done to stair carpets, bannisters, and furniture, through the awkwardness of handling heavy and bulky boxes, &c.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the “Phylloxera,” and other causes, such as “mildew,” &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection.

**MR. GILBERT-SMITH'S NEW BOOK****SERBELLONI. 3/9.**

"We are quite willing to be as bold as was Monckton Milnes, and—whether ridiculed or not—to declare that in his steady progress, his versatility of manner, his range of subject, ease of diction, his perfect mastery of melody, and his developing power of sustained thought, Gilbert-Smith's future is sure. The reason why we recommend this book in the *Artist* is that it is a volume which no lover of Nature could fail to appreciate. The more often we have read the poem the more we like it; a work full of melody, feeling, and thought, and the artist who loves his Keats and Wordsworth, would do well to add "Serbelloni" to his set of poems, which speak to him of what he strives to depict and through which he learns. No traveller going to Como should feel happy, even there, without this love-song by Nature's lover as his companion."—*The Artist*, March number.

"Most assuredly in 'Serbelloni' we have a poem which will pass into our language and literature . . . we almost venture to predict that in days to come this volume will be as intimately associated with the Lake of Como as the poems of Wordsworth are with Windermere. Though it is impossible to give any idea of the wealth of imagery or the sustained and noble thought concentrated into those two hundred pages, we trust we have said enough to show that 'Serbelloni' is one of the rarest of modern books of poetry—a poem which it would be well not only to read but to study."—*Scottish News*.

"Written in the elegant and melodious verse that assigns to their Author an especial place among contemporary poets."—*Morning Post*.

" Rama": A Sensational Story of Indian Village Life, by Colonel Barras (Simpkin, Marshall & Co.), is professedly founded on the genuine observations of the author. " Colonel Innes has executed the task he undertook with great skill and fidelity. It is evident that he has written from first hand; that he has carefully scrutinised the original documents; and has accepted only those conclusions which have forced themselves upon his judgment. The result is, that he has produced a work which should be in the library of every soldier. In all its aspects it has a special value, and we do not hesitate to recommend it to soldiers and civilians alike, as being interesting, instructive, and well written; and above all, a record thoroughly to be trusted. It is difficult to write too strongly of its merits."— <i>Army and Navy Magazine</i> for June, 1885.

## No. 2 Department.—CIGARS AND TOBACCO.

## HAVANAH CIGARS.

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

The following are its advantages:—  
Copies (unlimited number of) in Jet Black Printer's Ink can be obtained from one original writing.

Perfect facsimiles of any writing or sketch, the characteristics of the handwriting being carefully preserved.

The original can be written on any paper with any pen, in the ordinary way.

When sufficient copies have been obtained, by simply washing the Printing Plate for thirty seconds with the Cleansing Solution supplied, the Negative entirely disappears—without injuring the plate—leaving it again in its original state.

Originals written with the Special Ink will remain good any length of time, and can be transferred on to the plate three months after writing.

The average finished thickness of the various woods is an  $\frac{1}{8}$  in. less, viz., 1 in. wood will finish, when planed, only to  $\frac{7}{8}$  in.;  $\frac{3}{4}$  in., to  $\frac{5}{8}$  in.;  $\frac{1}{2}$  in., to  $\frac{3}{8}$  in.;  $\frac{1}{4}$  in., to  $\frac{1}{8}$  in.

Boards or pieces of wood planed on the flat side only, 0/1 per foot extra, for each side is charged, and if planed up and sawn and squared at ends, an extra charge is made for workman's time.

Any thickness of any wood over 1 in. is charged at the rate of 1 in. superficial, thus for 2 in. thick will cost just double of 1 in.

Parcels of wood, rough turned, 5/0, 10/0, and 20/0 each.

**Songs, by Mrs. R. H. Maude:—"As**  
Fades the Sunlight' is a graceful melody, with an artistically-managed episode. 'Aubade' is a Serenade set in the minor mode of a serious passionate type, ending with effective passage in major mode. The melody is broad and expressive. This would prove a good concert-room song. 'I Live Alone' is a graceful song, having an episode in which mingled groups of twos and threes are effectively employed; a coda of expressive vocal figures, accompanied by triplets, terminates the whole with some dramatic power, which, however, does not detract from naturalness of entire song.—*Academic Gazette*, March 1st, 1887.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the “Phylloxera,” and other causes, such as “mildew,” &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection.

From the composition of the sample of Oil—especially from its slightly acid, and highly

## No. 2 Department.—CIGARS AND TOBACCO.

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

The average finished thickness of the various woods is an  $\frac{1}{2}$  in. less, viz., 1 in. wood will finish, when planed, only to  $\frac{3}{4}$  in.;  $\frac{3}{4}$  in., to  $\frac{1}{2}$  in.;  $\frac{1}{2}$  in., to  $\frac{3}{8}$  in.;  $\frac{1}{4}$  in., to  $\frac{3}{16}$  in.

Boards or pieces of wood planed on the flat side only, 0/1 per foot extra, for each side is charged, and if planed up and down and squared at ends, an extra charge is made for workman's time.

Any thickness of any wood over 1 in. is charged at the rate of 1 in. superficial, thus for 2 in. thick will cost just double of 1 in.

Parcels of wood, rough turned, 5/0, 10/0, and 20/0 each.

# MR. GILBART-SMITH'S WORKS.

## MY LADYE AND OTHERS.

"Not much, if at all, inferior to the early productions of many distinguished poets, and there is no saying to what height the author may attain; he may become more famous in his respective branches of composition than Juvenal, Lucretius, and Theocritus, or, to come nearer home, than Thomas Moore, on whose lines, rather than on those of any ancient classic, one would imagine that he must be fashioned"—*Illustrated London News*.

"This is a volume to gladden the eye of the genuine book-lover. Mr. Gilbert-Smith's poems show a keen observation and a varied power, which not only make them well worth attention, but give promise of better things to come from the same quarter. We expect to hear of this writer again."—*The Queen*.

"Mr. Gilbert-Smith, whose delightful volume of poems, 'My Ladye and Others,' was the deserved success of last season in the poetical world, leaves England next month on a yachting cruise in the Mediterranean. It is sincerely to be hoped that his muse will inspire him when visiting the scenes of many a classical and historical event with fresh subjects, and that his journey will duly result in another charming volume of sonnets and poems."—*What Society* says, January 20th, 1883.

"A less expensive publication would have brought these clever satires within the reach of a larger public, and we almost grudge their restriction to the wealthy few. The burlesque of the super-sensual school is excellent. Nothing could well be funnier than the burlesque of would-be satirists contained in 'Beauty at a Dinner Party.' This latter, in its affectation of a certain affected vein of pseudo-morality, is one of the cleverest things we have seen for some time, and Mr. Gilbert-Smith is to be congratulated on a genuine success."—*Graphic*.

"The work of a true poet, and of one who promises to take a very high rank in English literature. . . . In strong contrast to these is the longest and one of the first poems in the volume, entitled 'Beauty at a Dinner Party: a Satire by the Cynic,' which is hardly equalled by anything of its kind in the language. . . . The work is exceedingly well printed and 'got up;' the binding and ornaments leave nothing to be desired, and it is altogether one of the most striking volumes we have seen for long."—*Liverpool Albion*.

"It was not necessary for this book to be produced, as it has been, with an elegance of type and binding—remarkable even in this age of costly publication—for it to achieve success. Mr. Gilbert-Smith's poetry is manly and unaffected, and in no way even faintly suggestive of the unpleasant nonentities to which we have been but too much accustomed. Without making any boastful assertion of Christianity, this New Poet is to be immediately congratulated upon the religious tone of his work. His reverence for God and Christ, and for the forms and morality of Christianity, are not unnecessarily prominent; but, as did the great poets of old, whenever it is natural for him to mention the Deity, Mr. Gilbert-Smith does so with sincere reverence. This is, indeed, a great quality just now, when our poets either glory in their æsthetic sentimentality or injure religion by rendering her ridiculous by their patronising airs and weak affectations. Admirably conceived, worthy even of the author of the 'Rape of the Lock,' is the charming satire, 'Beauty at a Dinner Party.' Two poems ('Toledo' and 'Cadiz') remind, without suggesting any trace of imitation, the reader of Lord Byron. The interior of the magnificent Cathedral of Toledo is thus beautifully described"—[pp. 91, 92, and 93, quoted].—*Morning Post*, December 23rd, 1882.

Published at 10s. 6d. Sold at the Stores, 7s. 10½d.

## THE LOVES OF VANDYCK:

A TALE OF GENOA.

"Mr. Gilbert-Smith, in a poem entitled 'The Loves of Vandyck,' has made a very successful attempt to revive the romantic school of poetry. . . . The poem, founded on a romantic episode in the life of Vandyck, tells of a festival given in the palace of the celebrated Sofronisba, Marchesa Lomellini, a *bel esprit*, where Vandyck saw the fair Paola Marchesa Brignole-Sale, whose stern lord was absent on an embassy into Spain. Mr. Gilbert-Smith introduces a charming song, which will give an idea of his manner of treating other than narrative verse. ('Ah! fly with me, sweetest.') . . . Fair Paola's truant husband returns, his jealousy is excited by a treacherous friend, and the loves of Vandyck and the beautiful Marchioness terminate tragically. There is much beauty and passion in the author's verse; it will make its mark. It is so musical as to be assured of a cordial reception from a numerous public, who will look forward with pleasure to a future verse story from the same gifted writer."—*Morning Post*.

"There is always ease and freedom in this writer's rhyme."—*Academy*.

"In various forms, but with equal success, the poetic faculty of this author has already been manifested. As a satirist, as a good-humoured mocker of affected satire, as a finished sonneteer, as a ripe and scholarly metaphysician, as a writer of plaintive and tuneful love ditties, as a classic, whose verses reflect the moods, now of Theocritus, now of Anacreon, now of Moschus and Bion, and agreeably indicate a returning bent towards the English pastoral poetry which faintly lingered to the early days of Leigh Hunt, and then fled like a dream of old fields. Mr. Gilbert-Smith is always himself, always delightfully natural, always free from taint or tinge of affectation. By evidence not to be traced in the texture of his firm and polished verse, but otherwise afforded, the author of the graceful little book now before us appears to be young. Promise and fruition, like the orange flower and the full-orbed ripeness on a single bough, are seldom presented at once; but the double offering is here. The subject of the historical or legendary poem, is happily chosen and as happily treated."—*Daily Telegraph*.

2s. 6d. Sold at the Stores, 1s. 10½d.

## THE LOG O' THE "NORSEMAN."

"A work of continuous interest."—*Academy*.

"Some fine descriptive stanzas and genuine ballads, which are rare indeed in modern poetry."—*Globe*.

"Powerful and pathetic in an unusual degree. His verse is always natural yet polished. Difficult to surpass in vigour and beauty."—*Morning Post*.

"From Marseilles round the Mediterranean, with excursions inland to Rome and other Italian cities. Mr. Gilbert-Smith has a genuine poetic gift . . . instinct with that subtle power which distinguished the poet from the herd of versifiers that infest literature nowadays. He rings the changes from grave to gay, and those who take him for their guide, philosopher, and friend through the cities and places he has visited will have no reason to regret their choice."—*Scotsman*.

"Mr. Gilbert-Smith's delightful string of sonnets, songs, and lyrics."—*Daily Telegraph*.

"Contains many high thoughts expressed in flowing verse."—*Queen*.

"A dexterous and fluent rhyming guide to the sunny south."—*World*.

"Mr. Gilbert-Smith is strong in descriptive power, and paints the gambling scene at Monte Carlo with the same force as the ruins of Pompeii."—*Yorkshire Post*.

"Many beautiful thoughts in exquisitely melodious verse."—*Galvani*.

"The Log of the Norseman' is undeniably romantic; it is written in verse, of a very finished description, and fulfils to a great extent the prophecies made concerning Mr. Gilbert-Smith. He has won his spurs as a recognised poet; his verses are polished, and are—a strangely rare quality at the present time—poetical. We believe that the Queen has accepted a copy of the work."—*Court Journal*.

## SERBELLONI.

"Written in the elegant and melodious verse that assigns to their Author an especial place among contemporary poets."—*Morning Post*.

"We are quite willing to be as bold as was Monckton Milnes, and—whether ridiculed or not—to declare that in his steady progress, his versatility of manner, his range of subject, ease of diction, his perfect mastery of melody, and his developing power of sustained thought, Mr. Gilbert-Smith's future is sure. The reason why we recommend this book in the *Artist* is that it is a volume which no lover of Nature could fail to appreciate. The more often we have read the poem the more we like it; a work full of melody, feeling, and thought, and the artist who loves his Keats and Wordsworth, would do well to add 'Serbelloni' to his set of poems, which speak to him of what he strives to depict and

through which he learns. No traveller going to Como should feel happy, even there, without this love-song by Nature's lover as his companion."—*The Artist*, March number.

"Most assuredly in 'Serbelloni' we have a poem which will pass into our language and literature . . . we almost venture to predict that in days to come this volume will be as intimately associated with the Lake of Como as the poems of Wordsworth are with Windermere. Though it is impossible to give any idea of the wealth of imagery or the sustained and noble thought concentrated into those two hundred pages, we trust we have said enough to show that 'Serbelloni' is one of the rarest of modern books of poetry—a poem which it would be well not only to read but to study."—*Scottish News*.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the “Phylloxera,” and other causes, such as “mildew,” &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection.

From the composition of the sample of Oil—especially from its slightly acid, and highly  
lubricating nature—I believe it to be very well adapted for application to the hair and for cosmetic  
purposes.

## No. 2 Department.—CIGARS AND TOBACCO.

### HAVANAH CIGARS.

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

## The Domestic Hand Ice Machine.

(Fleuss' Patents.)

These Machines are constructed to supply a long-felt want in all places where it is difficult to obtain a regular and cheap supply of ice, viz. :—

In all Hot Climates.

In Country Houses.

On board Ships and Yachts.

For Military and Naval Officers' Mess.

And for Military and Naval Hospitals.

Lawn Tennis and Garden Parties.

Domestic Purposes, &amp;c., &amp;c.

Ice is produced upon the well-known principle that water will freeze when rapidly evaporated by means of a vacuum pump and a powerful absorbent, such as sulphuric acid.

These pumps cannot get out of order, they are almost frictionless, and will at all times produce a practically perfect vacuum (*i.e.*, equal to what is known as the Torricellian vacuum), although worked at a slow and easy stroke; they will never allow air to leak back, even when allowed to stand for any length of time.

Ice can always be made in about three minutes. After the first film of ice is formed the water will continue to freeze until it is several inches thick, by merely giving an occasional stroke of the pump to stir the acid.

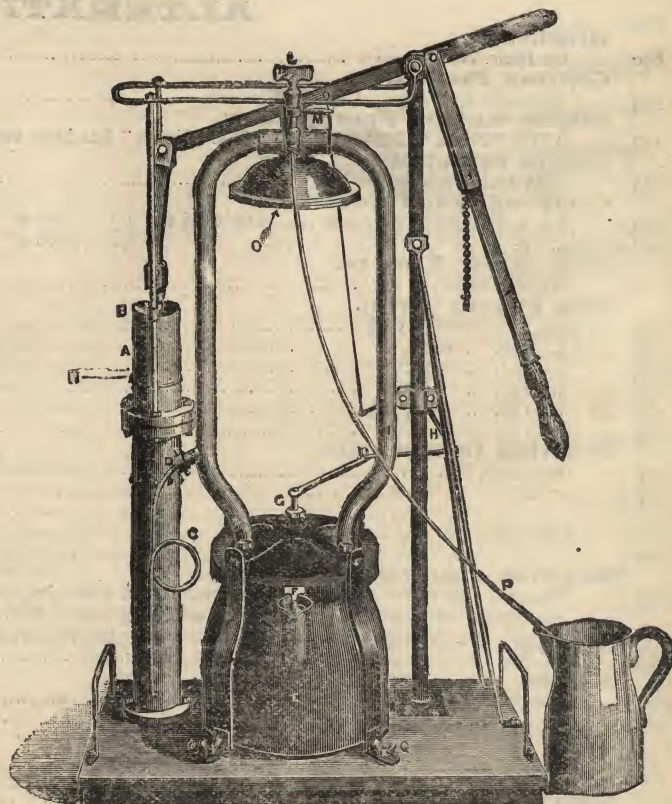

These Machines will ice drinking water, butter for the table, and will make ice creams, and block ice.

The average finished thickness of the various woods is an  $\frac{1}{8}$  in. less, viz., 1 in. wood will finish, when planed, only to  $\frac{7}{8}$  in.;  $\frac{3}{4}$  in., to  $\frac{5}{8}$  in.;  $\frac{1}{2}$  in., to  $\frac{3}{8}$  in.;  $\frac{1}{4}$  in., to  $\frac{1}{8}$  in.

Boards or pieces of wood planed on the flat side only, 0/1 per foot extra, for each side is charged, and if planed up and down, an extra charge is made for workman's time.

Any thickness of any wood over 1 in. is charged at the rate of 1 in. superficial, thus for 2 in. thick will cost just double of 1 in. Parcels of wood, rough turned, 5/0, 10/0, and 20/0 each.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the “Phylloxera,” and other causes, such as “mildew,” &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the “Phylloxera,” and other causes, such as “mildew,” &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection.

On Wednesday, the 3rd August, 1887, the following debentures of the Army and Navy Co-operative Society, limited (1st Series), were drawn in the presence of a Public Notary:—10, 38, 59, 65, 66, 82, 86, 138, 146, 157, 179, 189, 230, 262, 279, 315, 323, 334, 347, 372, 377, 578, 579.

### CHILDREN IN THE STORES.

The attention of Members is called to numerous complaints which have been made of the obstruction caused by the number of young children brought into the Stores. The Directors feel sure that the good sense of Members will remedy the inconvenience without driving them to the necessity of issuing regulations upon the subject.

### BACON.

The Bacon sold at the Stores is mild cured, and although little more salt in the summer than in the winter, Members are recommended not to order too large a quantity at a time. When a whole side is ordered, the fore-end should be cut first, as that part will not keep so long as the remainder.

### No. 11.—CHINA AND GLASS DEPARTMENT.

There is on show in the above Department an excellent bust of Her Majesty, specially designed for the Society in Lambeth Terra Cotta, by "White."

Dimensions ...	Height, 20 in. ; width, 13½ in.

### LIFE ASSURANCES.

#### MILITARY AND NAVAL SERVICES.

The Directors have made arrangements with the Legal and General Life Assurance Office, whereby Officers in both Services may take out Policies upon most advantageous terms, covering all risks arising from war or climate without extra premiums. Forms of proposal and any further information can be obtained from the Secretary.

### CORRESPONDENCE.

Several correspondents having complained that they are incorrectly addressed, the attention of Members is drawn to Rule 24 in the Price List, the non-observance of which alone gives rise to such complaint. In cases where Members do not care to append their rank or title, it would be of service if letters were written in the third person.

### BEGUINOT'S PREPARATIONS.

In consequence of Messrs. Beguinot's Manufacturing Premises being destroyed by fire, they are unable to guarantee a supply of their preparations.

### EGYPTIAN CIGARETTES.

SOCIETY'S OWN BRAND.

The attention of Members is called to the above. For prices, see page 20.

### LADIES' ELASTIC STOCKINGS, KNEE CAPS, &c.

These goods, as enumerated on page 1399 of the Price List, have been transferred to the Drug Department, where orders for the same should now be given.

### TO ANNUAL SUBSCRIBERS.

Outside the 250 miles and to any Goods Station or Port, with steamer communication, in the United Kingdom, 1s. 6d. in £ or part of £ of the amount of order.

These rates are applicable only in cases of their prepayment with the orders or from Deposit Account, and apply only to goods sent direct from the Stores. Instructions must be given with each order.

The Society reserves to itself the right of selecting route.

The above Rules do not apply to rocking-horses or perambulators.

The attention of Members is called to the advantages of the above arrangements, and to that of having their orders packed in non-returnable cases. See Price List, page 7, for particulars.

Army and Navy Co-operative Society,

LIMITED.

117, VICTORIA STREET, WESTMINSTER, S.W.

THE MERCHANDISE MARKS ACT, 1887.

By this Act, which only received the Royal Assent on the 23rd August, 1887, after the greater part of the September Price List and Stores Circular was in print, penalties are imposed upon all persons who apply "any false trade description" to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by, or on behalf of the seller and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

As many Articles sold by the Society are known by the name of some place or country (e.g., Windsor Soap, Vienna Baking Powder, Bengal Chutnee, Turkish Towels), and it is impossible to predict in what cases this description would be held "calculated to mislead customers as to the place or country where the goods are made or produced," Members ordering any such Articles from this List are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

By Order,

H. LAWSON,

Secretary and Assistant Manager.

1st September, 1887.

### HAVANAH CIGARS.

Owing to its large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

**THE MERCHANDISE MARKS ACT, 1887.**

By this Act, which only received the Royal Assent on the 23rd August, 1887, after the greater part of the September Price List and Stores Circular was in print, penalties are imposed upon all persons who apply "any false trade description" to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by, or on behalf of the seller and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

As many Articles sold by the Society are known by the name of some place or country (*e.g.*, Windsor Soap, Vienna Baking Powder, Bengal Chutnee, Turkish Towels), and it is impossible to predict in what cases this description would be held "calculated to mislead customers as to the place or country where the goods are made or produced," Members ordering any such Articles from this List are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

Secretary and Assistant Manager.

### The Domestic Hand Ice Machine.

(Fleuss' Patents)

These Machines are constructed to supply a long-felt want in all places where it is difficult to obtain a regular and cheap supply of ice, viz.:—

- In all Hot Climates.
- In Country Houses.
- On board Ships and Yachts.
- For Military and Naval Officers' Messes.
- And for Military and Naval Hospitals.
- Lawn Tennis and Garden Parties.
- Domestic Purposes, &c., &c.

Ice is produced upon the well-known principle that water will freeze when rapidly evaporated by means of a vacuum pump and a powerful absorbent, such as sulphuric acid.

These pumps cannot get out of order, they are almost frictionless, and will at all times produce a practically perfect vacuum (*i.e.*, equal to what is known as the Torricellian vacuum), although worked at a slow and easy stroke; they will never allow air to leak back, even when allowed to stand for any length of time.

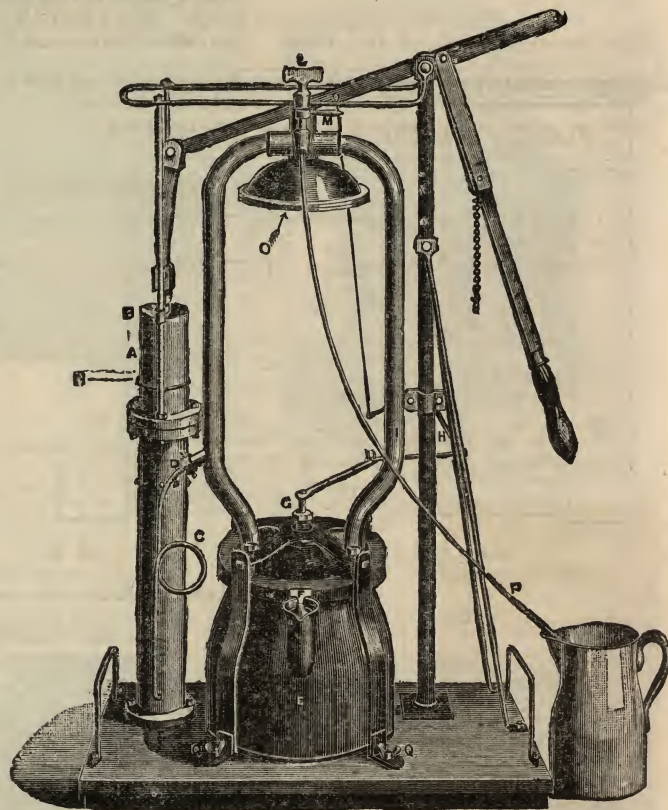

Ice can always be made in about three minutes. After the first film of ice is formed the water will continue to freeze until it is several inches thick, by merely giving an occasional stroke of the pump to stir the acid.

These Machines will ice drinking water, butter for the table, and will make ice creams, and block ice.

## "ECLIPSE" COPYING APPARATUS.

The following are its advantages:—

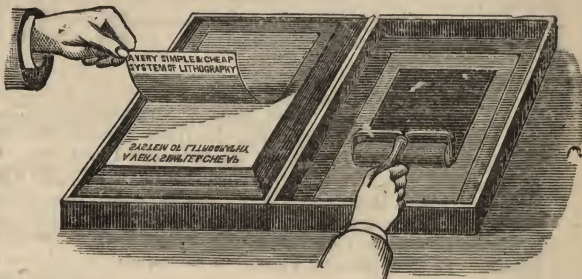

Copies (unlimited number of) in Jet Black Printer's Ink can be obtained from one original writing.

Perfect facsimiles of any writing or sketch, the characteristics of the handwriting being carefully preserved.

The original can be written on any paper, with any pen, in the ordinary way.

When sufficient Copies have been obtained, by simply washing the Printing Plate for thirty seconds with the Cleansing Solution supplied, the Negative entirely disappears—without injuring the plate—leaving it again in its original state.

The average finished thickness of the various woods is an  $\frac{1}{8}$  in. less, viz., 1 in. wood will finish, when planed, only to  $\frac{7}{8}$  in.;  $\frac{3}{4}$  in., to  $\frac{5}{8}$  in.;  $\frac{1}{2}$  in., to  $\frac{3}{8}$  in.;  $\frac{1}{4}$  in., to  $\frac{1}{8}$  in.

Boards or pieces of wood planed on the flat side only, 0/1 per foot extra, for each side is charged, and if planed up and down and squared at ends; an extra charge is made for workman's time.

Any thickness of any wood over 1 in. is charged at the rate of 1 in. superficial, thus for 2 in. thick will cost just double 1 in.

Parcels of wood, rough turned 5/0, 10/0, and 20/0 each.

### THE MERCHANDISE MARKS ACT, 1887.

By this Act, which only received the Royal Assent on the 23rd August, 1887, after the greater part of the September Price List and Stores Circular was in print, penalties are imposed upon all persons who apply "any false trade description" to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by or on behalf of the seller, and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

As many articles sold by the Society are known by the name of some place or country (e.g., Windsor Soap, Vienna Baking Powder, Bengal Chutnee, Turkish Towels), and it is impossible to predict in what cases this description would be held "calculated to mislead customers as to the place or country where the goods are made or produced," Members ordering any such articles from this List are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

### THEATRICAL TICKET OFFICE.

Members having Deposit Accounts are informed that seats in the best positions at the Theatres may be secured at the above office, on the ground floor next the lift, and the seats charged to Deposit Account. Letters and telegrams containing orders on Deposit Account will receive special attention.

### MAGIC LANTERN SLIDES FOR HIRE.

No. 12.—PORTMANTEAU & GAMES DEPARTMENT.  
The Society now undertakes the supply of Magic Lantern Slides on hire.  
For general conditions and terms see page 21 of this Circular.

### FIREWORKS.

Orders for Fireworks can now be received in No. 12 Department.  
Members are requested to forward their orders as early as possible to ensure punctual delivery. For particulars and prices see page 1407 of the present Price List.

### BEGUINOT'S PREPARATIONS.

In consequence of Messrs. Beguinot's Manufacturing Premises having been destroyed by fire, they are unable to guarantee a supply of their preparations.

### CORRESPONDENCE.

Several correspondents having complained that they are incorrectly addressed, the attention of Members is drawn to Rule 24 in the Price List, the non-observance of which alone gives rise to such complaints. In cases where Members do not care to append their rank or title, it would be of service if letters were written in the third person.

### DIVIDEND AND INTEREST ON BONUS.

An Interim Dividend of 5 per cent. per annum on the Society's Shares, and Interest on the Bonus at the rate of 5 per cent. per annum, will be payable on application on and after October 14th. In the case of Shareholders having Deposit Order Accounts the Dividends and Interest will be credited to such Accounts, unless otherwise requested.

### LIFE ASSURANCES.

#### MILITARY AND NAVAL SERVICES.

The Directors have made arrangements with the Legal and General Life Assurance Office, whereby Officers in both Services may take out Policies upon most advantageous terms, covering all risks arising from war or climate without extra premiums. Forms of proposal and any further information can be obtained from the Secretary.

### CIGARETTES.

The attention of Members is called to the above. For prices, see page 9.

## HAVANAH CIGARS.

Owing to a large reserve of the 1885 Crop, the Society is freed from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

## General Conditions.

The undermentioned prices for Hire of Magic Lantern Slides are for one day's hire, the day being reckoned from noon to noon.

The hiring commences at noon on the day the Slides leave the Stores, and terminates at noon on the following day.

Should it be desired to hire the Slides for more than one day, **half price extra will be charged for each subsequent day**; notice of any such extension of hire being required must be given at the time of ordering.

To prevent any possible inconvenience, it is advisable that all orders be booked in advance.

In selecting the subjects of the Slides for hire, it is requested that Members will notify others that may be substituted, in the event of any particular subject required not being available.

The usual allowance of carriage does not apply to the hire of Magic Lantern Slides, so that all expenses in connection with the transit of Slides to and from the Stores will be defrayed by Member hiring same.

With all Slides sent out a Delivery Note will be enclosed, which the Member is requested to compare with the total number of Slides received, and to return the Delivery Note with the Slides.

Members hiring Slides will be held responsible for their return in perfect condition.

## Town Orders.

Members will oblige by sending for any slides required for hire as the Society cannot hold itself responsible for delivery by any specified time.

## Country Orders.

Slides ordered to be sent beyond a distance of ten miles from the Stores are despatched the day previous to that on which they are to be used, and if they are returned to the Stores by **first train on the morning after being used**, one day's hire only will be charged.

The Slides will be sent from the Stores by passenger train, to ensure, as far as possible, punctual delivery, but the Society will not hold itself responsible for any delay on the part of the railway companies.

Whereas there has been a comparative failure of vintages in France, owing to the ravages of the "Phylloxera," and other causes, such as "mildew," &c., large vintages have been made on Mr. ROBERT SCHLUMBERGER'S Vöslau Estates, and last year a vintage of almost unexampled quality has been gathered. These causes combined have not failed in effect, and thus these generous and palatable Wines may now be had at a reasonable price, and in a state of high perfection

# STORIES CIRCULAR.

No. 105.]      Teleph. { 3080, 3145,  
                     Nos. {        3112.

1ST NOVEMBER, 1887.

Subscription { Home Stations, 1/0 per Ann.  
Foreign do. 1/6 do.

By this Act, which only received the Royal Assent on the 23rd August, 1887, after the greater part of the September Price List and Stores Circular was in print, penalties are imposed upon all persons who apply "any false trade description" to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by or on behalf of the seller, and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

As many articles sold by the Society are known by the name of some place or country (*e.g.*, Windsor Soap, Vienna Baking Powder, Bengal Chutnee, Turkish Towels), and it is impossible to predict in what cases this description would be held "calculated to mislead customers as to the place or country where the goods are made, or produced," Members ordering any such articles from this List are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

Orders for Fireworks can now be received in No. 12 Department.

Members are requested to forward their orders as early as possible to ensure punctual delivery. For particulars and prices see page 1407 of the present Price List.

Several correspondents having complained that they are incorrectly addressed, the attention of Members is drawn to **Rule 24** in the Price List, the non-observance of which alone gives rise to such complaints. In cases where Members do not care to append their rank or title, it would be of service if letters were written in the third person.

HAMPERS.  
BOXES.

Orders can now be received, and Members are requested to order early to avoid disappointment.

**SPECIAL NOTICE.**  
Members sending goods to the Stores are requested to enclose or attach a card, bearing Name, Ticket No., and Address, as a means of identification on arrival, much inconvenience, delay, and correspondence frequently occurring through inability to trace the senders.

THE SOCIETY'S OWN BRAND.

The attention of Members is called to the above. For prices, see page 12.

## HAVANAH CIGARS.

Owing to a large reserve of the 1885 Crop, the Society is free from the necessity of listing any of the unsatisfactory 1886's for the present. The latter can, of course, always be obtained to order, but should certain sizes of 1885's run out, Members are recommended to apply for the nearest to them in size and price, as in most brands many sizes are very similar.

The Domestic Hand Ice Machine.  
(Fleuss' Patents.)

These Machines are constructed to supply a long-felt want in all places where it is difficult to obtain a regular and cheap supply of ice, viz.:—

- In all Hot Climates.
- In Country Houses.
- On board Ships and Yachts.
- For Military and Naval Officers' Messes.
- And for Military and Naval Hospitals.
- Lawn Tennis and Garden Parties.
- Domestic Purposes, &c., &c.

Ice is produced upon the well-known principle that water will freeze when rapidly evaporated by means of a vacuum pump and a powerful absorbent, such as sulphuric acid.

These pumps cannot get out of order, they are almost frictionless, and will at all times produce a practically perfect vacuum (*i.e.*, equal to what is known as the Torricellian vacuum), although worked at a slow and easy stroke; they will never allow air to leak back, even when allowed to stand for any length of time.

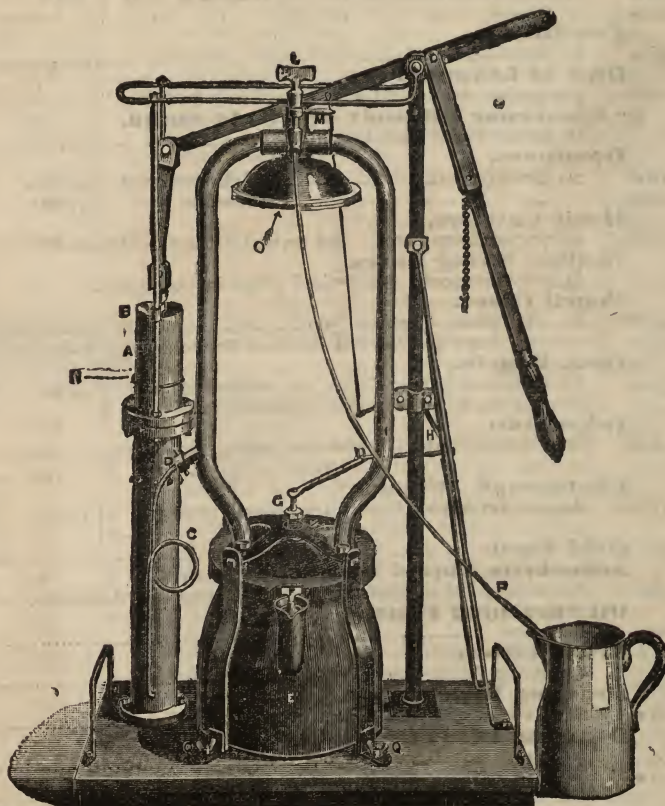

Ice can always be made in about three minutes. After the first film of ice is formed the water will continue to freeze until it is several inches thick, by merely giving an occasional stroke of the pump to stir the acid.

These machines will ice drinking water, butter for the table, and will make ice creams, and block ice.

## NEW BOOKS.

Pub. at Sold at

New Book by the Author of "Lays of Ind," entitled "Lays of the Sea-side: a Rhythimical Rendering of Sea-side Stories and Incidents." By Aliph Cheem 5/0 net.

New Book by Author of "Rama: a Sensational Story of Indian Village Life," entitled "The Beautiful Miss Vivian; or, Society in the Colonies." By Col. Julius Barras 5/0 3/9

"The Beautiful Miss Vivian," by Julius Barras (Simpkin, Marshall, & Co.), is styled by the author a 'society novel,' and though there is not much in it of what novel-readers call a story, there is abundance of lively description, flirtation, intrigue, and sporting adventures in these amusing sketches of colonial life in and about 'Candourtown.' Colonel Barras is a vivacious writer, as every one knows who has read 'India and Tiger-Hunting,' and he does not cease to be entertaining from the opening to the finish of 'The Beautiful Miss Vivian.'—*Saturday Review*, 24th September, 1887.

## No. 10 Department—ACCOUTREMENTS, HARNESS, &c. ADDITIONS.

The "Shakespeare" Cot, a Child's New Bed (Patent).

SIZE PACKED.

This new invention is strong and simple, easily taken to pieces and put together again, packs into a small compass, and weighs 15 lbs. The canvas is in one piece, which is stretched on to a frame, thus forming such an easy, pliable bed that a mattress is not needed.

To ERECT THE COT.—First spread out the canvas, then pass the side rods through the open seams. Fix on the short end pieces to the side rods inside the canvas, keeping the brass angles that lean to one another upwards. The leg rods pass through the brasses into the pockets at the head of the bed, then lace up the ends tightly together.

Made in three Sizes.—No. 1, 4 ft. long, 2 ft. wide, 18 to 12 in. sides, weight 15 lbs. No. 2, 3 ft. 6 in. long, 1 ft. 8 in. wide, 18 to 12 in. sides, weight 13 lbs. No. 3, 3 ft. long, 1 ft. 6 in. wide, 18 to 12 in. sides, weight 12 lbs.

**THE MERCHANDISE MARKS ACT, 1887.**

By this Act, which only received the Royal Assent on the 23rd August, 1887, after the greater part of the September Price List and Stores Circular was in print, penalties are imposed upon all persons who apply "any false trade description" to the goods sold by them, and a "trade description" includes any direct or indirect statement as to the place or country where the goods are made, or the materials of which they are composed. In addition to this, the seller is deemed to warrant that the description is not "false" within the meaning of the Act, unless the contrary is expressed in some writing signed by or on behalf of the seller, and delivered at the time of sale to, and accepted by, the Purchaser. Moreover, even if a trade description is now lawfully and generally applied to any goods, to indicate the class or method of manufacture, the Act applies where it includes the name of a place or country, and is calculated to mislead as to the place or country where they were made or produced, unless they bear an equally conspicuous notice of the place or country where they were made or produced.

As many articles sold by the Society are known by the name of some place or country (e.g., Windsor Soap, Vienna Baking Powder, Bengal Chutnee, Turkish Towels), and it is impossible to predict in what cases this description would be held "calculated to mislead customers as to the place or country where the goods are made or produced," Members ordering any such articles from this List are hereby informed that the Society does not give any warranty that they are made or produced in the place or country after which they are named.

**MOËT'S CHAMPAGNE.**

Members are informed that, for the future, Messrs. Moët and Chandon will entirely discontinue to style their finest extra quality wine "Brut Imperial," and that it will now be labelled "Dry Imperial."

### NOTICE.

### PACKING CASES.

It is desired to draw the attention of Members residing outside the limit of the London Delivery (see page 83 of Price List) on the following railways—Great Eastern, Great Northern, Great Western, Midland, and London and North Western—to the advantages of having their orders packed in Non-returnable Cases, which are supplied at a charge of 4d. in the £1 on the value of the Order as per Rule 39 and page x. in the Price List. The minimum charge for the carriage of Returned Empties on the above lines is—

#### 6d. up to 25 Miles from London.

8d.	"	150	"	"
9d.	"	200	"	"
11d.	"	250	"	"
1s.	"	300	"	"

It will be seen that the cost of a Non-returnable Case for a £1 order would be 4d., whereas the charge for the return of an ordinary case by rail, even within 25 miles, would be 6d., and for longer distances, the difference would be greater. In addition to the actual difference in expense, by ordering Non-returnable Cases the trouble of having Empty Cases conveyed from the Member's Residence to the Railway Station will be saved, and any correspondence on the subject avoided.

Sundry Empties, such as Biscuit Tins, &c., for which the Society allows credit, might be retained until a sufficient number have accumulated to fill a case.

The Domestic Hand Ice Machine.  
(Fleuss' Patents.)

These Machines are constructed to supply a long-felt want in all places where it is difficult to obtain a regular and cheap supply of ice, viz.:-

- In all Hot Climates.
- In Country Houses.
- On board Ships and Yachts.
- For Military and Naval Officers' Messes.
- And for Military and Naval Hospitals.
- Lawn Tennis and Garden Parties.
- Domestic Purposes, &c., &c.

Ice is produced upon the well-known principle that water will freeze when rapidly evaporated by means of a vacuum pump and a powerful absorbent, such as sulphuric acid.

These pumps cannot get out of order, they are almost frictionless, and will at all times produce a practically perfect vacuum (i.e., equal to what is known as the Torricellian vacuum), although worked at a slow and easy stroke; they will never allow air to leak back, even when allowed to stand for any length of time.

Ice can always be made in about three minutes. After the first film of ice is formed the water will continue to freeze until it is several inches thick, by merely giving an occasional stroke of the pump to stir the acid.

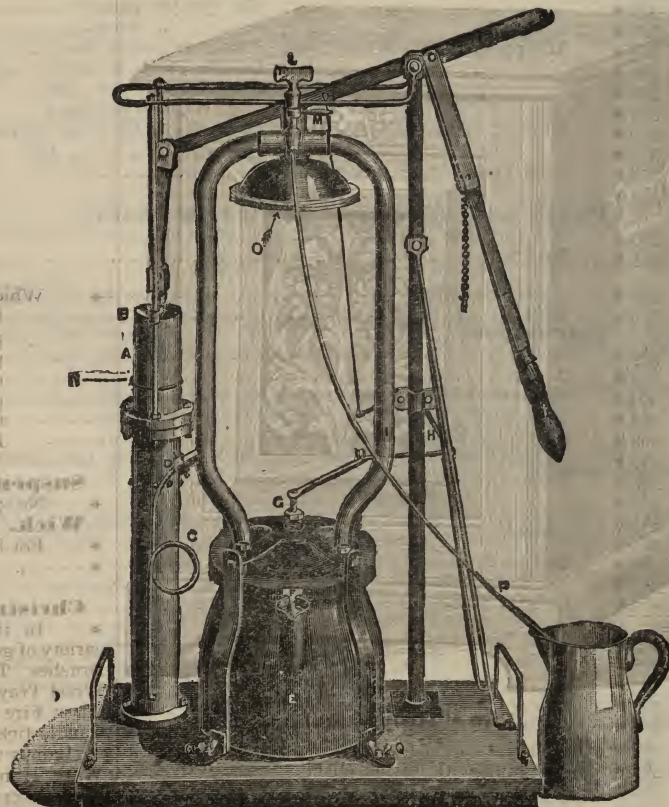

These machines will ice drinking water, butter for the table, and will make ice creams, and block ice.
